The 7,62 mm general-purpose machine gun UKM-2000 is fed by 7,62 x 51 mm NATO ammunition in M13 disintegrating belt. It is produced in four versions: infantry version (UKM 2000P with fixed butt), landing version (for landing troops – UKM-2000D with folded butt), tank versions: UKM-2000C – right feeding and UKM-2000CL – left feeding. The UKM-2000C/CL versions with electro-trigger do not have butt, pistol grip and mechanical sights and can be mounted on tanks, infantry combat vehicles and other armoured vehicles.

**Main characteristics:**

- very good tactical and technical characteristics which allow for effective firing at a distance of 1500 m
- high rate of fire 700-850 rds./min.
- high reliability
- the GPMG UKM-2000 is made of high quality materials which are conformable with Polish and European military standards
- one of the few GPMGs constructed after 2000
- it can be used in various types of Armed Forces
- it is equipped with Picattiny rail in accordance with MIL STD-1913 on which any optical equipment (sights, night-vision devices, grips, pointers, flashlights, etc.) can be mounted
- Polish design and construction.
