POLISH ARMAMENTS GROUP

The 40 mm multi-shot grenade launcher RGP-40 is a semi-automatic, six-shot weapon using 40 x 46 mm NATO grenades. It has an integral cartridge drum with six chambers with a length of 140 mm, which allows to use a wide variety of ammunition, including special types. The weapon is fully adapted both for right and left handed gunners. It is equipped with adjustable butt and universal mounting rail for attaching collimator sight. On the barrel cover there are three rails for mounting additional accessories. During the firing from the RGP-40 it is possible to cover with fire an area of 20 x 60 meters in a few seconds at a distance of up to 400 m (600 – 800 m), without the loading the weapon. Taking into consideration weight, rate of fire and reliability, RGP-40 is in the same class as the other similar grenade launchers produced in the world.

Main characteristics:

- high rate of fire
- effective range from 600 m to 800 m (depending on ammunition type)
- high accuracy
- high efficiency of firing
- low weight
- high manoeuvrability
- high quality of performance
- the possibility of using different types of ammunition.

Technical data:

Calibre (mm)	40
Cartridge (mm)	40 x 46
Weapon length (mm)	850
Barrel length (mm)	250
Weight (kg)	6,3
Effective range (m)	400 – 800
Operating principle	semi-automatic
