

# Mobile container shooting range 40 ft HC

The shooting range enables firing training on the distance of 5 to 50 m using live-ammunition and laser pointers. The shooting zone is designed for shooting in a regular and changeable position of firing line with pistols and revolvers of central and side ignition in calibre up to 11,43 mm as well as machine guns of calibre up to 9 mm with single fire and standard JHP, FMJ bullets with soft core.

Zakłady Mechaniczne Tarnów

The mobile container shooting range is highly specialized facility for firing training which enables organizing shooting in any place and time without logistic problems. It enables training with handguns for Police Officers and the post crews of e.g. Border Guard in the workplace. The Shooting Range can be set on the given area and ready for training within very short time. It consists of two or more containers in which it is possible to practice shooting in a regular and changeable position of firing line on the distance of 5 to 50 m. The main advantage of Shooting Range is possibility of installing the interactive training simulator for firing with live ammunition or firing from weapon replicas with laser pointers. The simulator also allows to lengthen the axis of shooting.

Main characteristics:

- low cost of production and exploitation in comparison with stationary shooting range
- shooting using live-ammunition
- minimal influence (noise) on the environment
- easy transport from one location to another one
- it can be mounted on prepared base or it can be used on trailers for container transport
- one Mobile Shooting Range can be used in several military units located in different areas
- short start up time of shooting range in any location.
